

Quarterly Review of the Economy

National Council of Applied Economic Research, New Delhi

NCAER has been monitoring and analysing the macro aspects of the Indian economy for a number of years. Based on our analysis of the economy, we offer a package of reports and seminars comprising of,

1. Quarterly Review of the Economy
2. Quarterly Business Expectations Survey
3. Monthly Journal MacroTrack
4. Quarterly State of the Economy Seminars

The package is provided as an annual subscription service under the title “Quarterly Review of the Economy”.

Apart from these reports and seminars we also invite Quarterly Review subscribers for our occasional lectures, conference and seminars organised by the National Council.

The Quarterly Review has been designed to meet the needs of policy makers, corporates and others interested in tracking latest developments in the Indian economy. It provides analysis of current policies and tracks developments in the domestic as well as the global economy. The growth forecasts of NCAER are objective and are widely quoted and referred to both in the Indian as well as the international media. An integral part of the Quarterly Review is the State of Economy Seminars organised quarterly at NCAER, bringing together policy makers, industry leaders and researchers on one forum.

For details on subscription for the QRE please write to: indpack@ncaer.org
